### **TIAS' AWESOME FlightScanner takes off!**

In this period of declining commissions and increasing competition, TIAS has today released an amazing air booking solution designed to boost agent profits and improve customer service. FlightScanner enables travel agents to quickly and easily search and book real-time air fares of over 60 low cost carriers worldwide, including Jetstar, Virgin Blue, Ryanair, easyJet, Aer Lingus, bmi and British Airways. Regions serviced include Europe, USA, South Africa and Australasia.

The system searches low cost airlines flying the required route, compares the fares and displays the results on a single screen. Agents can then quickly and easily select and book their preferred choice.

TIAS' GM Sale and Marketing, Gerald Chait said: "FlightScanner offers savvy travel agents the ability to sell profitable air bookings, provide superior customer service, generate new revenue streams and offer low cost fares which were previously difficult and time-consuming to access. European fares from less than £1 (plus taxes) have been available through FlightScanner".

Chait adds: "By adding service fees, agents are able to offer customers unbelievably low fares whilst at the same time earning excellent profit on the booking. Customer service levels are also significantly improved by offering clients fares that they would generally not be aware of. Travel agents with access to FlightScanner will enjoy a competitive advantage, enabling them to service their clients more efficiently and retain their customer base."

Find out how FlightScanner can improve your business. For a FREE 14 day trial, please contact TIAS Help Desk on 1300 300 527 or email [info@tias.com.au](mailto:info@tias.com.au)
